

Aman Yadav

Powai, Mumbai 400076 | yadav200289@gmail.com | 9594457453 | LinkedIn

Skilled full stack .NET Developer with 3 years of experience in Entity Framework, LINQ, and SSMS for backend. React, AJAX, and jQuery for front-end development. Focused on building efficient, scalable applications.

Work History

WEBIKNOWS IT SOLUTIONS

Sr. Software Engineer

Thane, IN

Feb 2024 – Present

CODEARRAY TECHNOLOGIES

Software Developer

Mumbai, IN

Jun 2022 – Feb 2024

Projects

Uphaar / Mankind (Retailer Loyalty & Rewards)

- Played a key role in developing a retailer loyalty and rewards web application using .NET and SQL Server Management Studio (SSMS).
- Designed and implemented target-based schemes and point redemption features, resulting in increased user engagement and loyalty among retailers, contractors, and distributors.

Nexify (Fund Management)

- Contributed to a project utilizing a range of technologies, including legacy .NET Framework 4.5, Microsoft SQL Server Database, and integration with third-party APIs.

HRMS (Human Resource Management System)

- Contributed to modules such as Staff Attendance and the Salary Module.
- Implemented essential background services for staff attendance data import and salary slip generation.

UMIS (University Management System)

- Contributed to the development of a university management web application using .NET and PostgreSQL.
- Implemented key modules, including External Student Registration and Exam Center Allocation.
